MOBILE CARPET CLEANING
MOBILE WINDOW CLEANING

HARD WATER DAMAGE PROTECTION

Self-Contained "Soft Roller"

- The "Soft-Roller" provides the features of a large capacity water softener, engineered in a small cart (aprox 24" tall), which can be easily transported offsite to the boat or RV.
- The Soft-Roller quickly attaches to a garden (water) hose, has a built-in brine tank and needs no power to recharge.
- Detailers should see a 30-50% reduction in soap usage and a 30% savings in wash time.
- For many Detailers the soap and labor savings will likely offset the cost
